

West of England Partnership
Joint Transport Executive Committee
16 July 2009

Joint Transport Asset Management Plan

Purpose of this Report

1. To confirm the Committee's endorsement of the Joint Transport Asset Management Plan (JTAMP).

Background

2. The JLTP sets out an action plan for developing a Joint Transport Asset Management Plan (JTAMP), a long term plan setting out how the four highway authorities will manage the West of England's transport infrastructure to deliver agreed levels of service and performance targets in the most cost-effective way. An Officer Working Group – chaired by South Gloucestershire and made up of asset management staff from each Council, a representative from GOSW and a specialist consultant - has met at regular intervals to develop and agree the JTAMP.
3. Committee members considered a report and presentation summarising the JTAMP on 24 April 2009. Given the extent of information contained in the JTAMP members deferred a decision to endorse the document to give a further opportunity to consider its contents in more detail, and requested that the JTAMP was brought back to a future meeting for a decision on its endorsement.
4. Since 24 April officers in the four councils have discussed the JTAMP with members and no amendments to the document have been requested.

Recommendation

That the Joint Transport Executive Committee:

- (a) Endorses the Joint Transport Asset Management Plan; and
- (b) Notes that the Plan is a living document that will be updated and extended as knowledge and experience of asset management grow.
