Subject: Greater Bristol Bus Network

Steve

Further to this mornings telephone conversation, I can confirm that we are in a position to deliver all bus shelters within the required delivery times. This obviously is dependant of Bristol City Council, South Gloucestershire, North Somerset and Banes being in a position to identify the shelter tyres required and orders being placed. As explained at the recent meeting with your partners delivery to us of each shelter takes 6/8 weeks from time of order.

I trust you will find this to be in order and should you require any further information please do not hesitate to contact me.

Kind Regards
Paul

For the attention of Mr Steven Riley

Dear Sirs,

Re: Showcase Bus Corridors

Further to our meeting I would confirm, on behalf of the Directors of Siemens Traffic Controls, that we would welcome the opportunity to work with Bristol City Council and the other members of the Joint Local Transport Plan on the proposed Showcase Bus Corridors. We recognise that the work shall commence July 2007 and be due for completion in May 2012 and commit to providing planned available resource to meet your requirements.

Siemens has experience of working on major projects that have condensed installation timescales involving liaison with several other contractors, such as ACIS. We would be prepared to agree to regular liaison meetings to ensure that works are planned around your requirements.

If you require any further information then please do not hesitate to contact me.

Yours faithfully,

Michael Murphy
Director of Field Services

7 December 2006

Dear Steven,

Further to our recent meetings and discussions relating to the proposed Greater Bristol Bus Network, I thought it would be helpful to state our commitment and competence in delivering the real time system.

ACIS has been a partner with Bristol City Council for nearly 10 years in the definition, design, effective introduction, and on budget delivery of the successful Bristol real time passenger information system. We have reviewed the proposed Greater Bristol Bus Network with the relevant partners, and are able to confirm that ACIS has the technological, operational, financial, and engineering strengths to be able to deliver the entire real time component of the Greater Bristol Bus Network. Adding to Greater Bristol Bus Network's skills and experience, our proven ability in working with other partners (such as bus operators, UTMC providers, and traffic light signal companies) in delivering a joined up and complete system remains a key strength of our commitment to the project.

ACIS is a proud partner of the Greater Bristol, Bus Network.

Sincerely yours,

Bronson H. Fargo
 Sales Manager
