

I am not clear about the process through which to lodge comments on the proposed changes that followed the lunch time discussion on Thursday 18th.

The document as circulated failed to pick up on what I had thought had been agreed changes in the session

1. To add non physical criteria to Policy 12 e.g. "the impact upon economic regeneration or other core strategy objectives"
2. To alter the wording in Appendix A in relation to the Strategic Areas A and B to make clear that any allocation was subject to further environmental study and that thermal was excluded. This latter was very important.
3. Matthew and I made clear that we have very strong objections to the proposed revisions to 6.15. 3 in that the change mentioned in the meeting by WEP would worsen the blight problems rather than reducing them. This paragraph revision more explicitly blights the entire strategic area A and B, in that it means that any development of any part of those areas must be refused as not in accordance with the the Waste Local Plan unless it is shown it does not prejudice the delivery of the plan (or material considerations indicate otherwise) until a site and methodology is identified for the waste site I do not know how that can possibly be satisfied.

Please could you lodge this as an objection to the proposed revisions tabled to us on Friday 19th.
