

Addendum to the Schedule of Proposed Changes to the Joint Waste Core Strategy published 24th November 2010.

Proposed Changes are highlighted in bold text and proposed deletions are struck through in bold.

Change no	Page no of JWCS	Policy/ para no of JWCS	Proposed Change (as suggested by the Partnership Authorities)
PC 79	30	Section heading and Para 6.8.12	The potential role of <u>new development</u> urban extensions 6.8.12 The draft RSS proposes a number of urban extensions within the West of England sub-region. National policy supports the location of waste activities within areas of new development, <u>which may have a role to play in providing the required local waste management infrastructure</u> .
PC 80	30	Para 6.8.13	Delete paragraph 6.8.13 It is not considered appropriate to explicitly identify the urban extension areas in the JWCS as they are yet to be confirmed by the final RSS. However, it is recognised that should urban extensions remain a requirement they will change the nature of the area and have a role to play in providing the required local waste management infrastructure.
PC 81	30	Para 6.8.14 renumbered to 6.8.13. and text clarified as follows:	6.8.13 Any urban extension required by the published RSS <u>New development</u> should provide for integrated waste management infrastructure <u>where appropriate</u> . In particular, in the early stages of planning <u>major development</u> , new urban extensions, any scope for integrating waste management and heat generation should be exploited where practicable.
PC82-addendum to PC66	30	Footnote at Table 6.5 as follows:	'The Gross annual requirement varies each year, those shown relate to the year specified only. The gross cumulative figures are totalled from the projected gross annual requirement for all years including those not shown in the table.'
PC83-replaces PC33	41	Clarification to supportive text to policy 13, with additional para at 6.15.3.	<u>6.15.3 Within the Strategic Areas, the purpose of safeguarding is to ensure that the delivery of the Joint Waste Core Strategy, would not be prejudiced by development/redevelopment proposals. The key development criteria, make clear that any waste related proposals should be consistent with the objectives and provisions of any local development document relevant to the strategic area.</u>
