In going through the Schedule of Changes, I have picked up something else which will need to be changed, which does not appear to have been picked up previously and is not covered in the Schedule of Changes. That concerns references to the RSS on page 30 under the heading 'The potential role of urban extensions' and affects paragraphs 6.8.12 to 6.8.14.

I am not sure how this should be dealt with procedurally and I assume you will refer that question to the Inspector.

As a starter, I have set out below suggestions for how this might be dealt with:

- Heading – change to 'The potential role of new development'
- delete 1st sentence of 6.8.12 and the 1st and 2nd sentences of 6.8.13 to produce a new paragraph which would read 'National policy supports the location of waste activities within areas of new development, WHICH MAY have a role to play in providing the required local waste management infrastructure.'
- 6.8.14 - delete 'Any urban extension required by the published RSS' and amend to read 'NEW DEVELOPMENT should provide for integrated waste management infrastructure WHERE APPROPRIATE.'
- 6.8.14, 2nd sentence – delete 'new urban extensions' and substitute 'major development'.

Regards

Paul Davis
