

Key Service Objectives

- To divert Contract Waste from landfill
- To contribute to reuse and recycling
- To seek opportunities for recovery of value from Contract Waste
- To provide a service that ensures that the principles and priorities of sustainable development are used.
- To provide a Service that is designed to be resource and energy efficient from construction through operation to decommissioning stages
- To minimise adverse effects on climate change from the collection, handling, treatment and disposal of Contract Waste
- To provide an affordable Service that delivers Best Value
- To offer maximum practical flexibility to accommodate changes in waste arisings, waste composition and legislation
- A waste treatment solution that contributes towards the environmental goals for the Authorities, as measured by its contribution to the following:
 - Treatment and reprocessing in accordance with the Proximity Principle;
 - Contributing to the treatment capacity called for in the South West Regional Waste Management Strategy.
